- Once used, great experience, high customer loyalty
- Good margin, high performance
- Selective availability in the market

WHAT IS P.E.T. TAB® ?

P.E.T. TAB® (Performance Enhancement Tablet) is a mode of cleaning developed with a mix of inorganic salts working in synergy, based on the science that bacteria grow and multiply within biofilm. (slimy layer on walls and pipes). This is where no biocide has an answer. P.E.T. TAB® has and is therefore a must for easy and safe water maintenance. Each tab maintains 16,000 gallon pool water per week.
