

THE SUTHERLAND

The Ultimate On-ground Pool

presented by:

the story...

Sutherland Falls is a high volume waterfall of three steps on a mountainside in New Zealand's Fiordland National Park. The three drops occur in such quick succession that when viewed from the air the falls appear to be one long drop. Its total drop is 1904 feet. Sutherland Falls is named after Donald Sutherland, a prospector who found the falls in 1880.

The Sutherland is one of the most versatile swimming pools in the industry today. The Sutherland **can be installed on-ground or semi-inground!** Every Sutherland Pool is produced in North America and features a Vinyl Works deluxe liner, also manufactured in North America.

The Sutherland is available in 8 standard shapes and sizes, round or oval, and is available in just about any custom shape or size you can imagine.

The Sutherland on-ground pool is solid as a rock! Steel buttress technology and architectural design reinforce its walls with amazing support. In fact, it's the strongest on-ground swimming pool structure. Its walls won't buckle, puncture, or collapse like many other aboveground or semi-inground pools on the market today.

The Sutherland is manufactured with 14 gauge, powder coated steel walls. The high tech epoxy powder coated system that's used is unrivaled in the category allowing us to offer a **Lifetime Warranty!**

And, if you want to add a salt generation system, that's not an issue. Sutherland is totally resistant to the corrosive nature of salt generators.

Now that's versatility!

What good is a pool if you can't sit at the water's edge to cool your feet or just to rest? The Sutherland offers a **5 inch top perimeter rail** so you can do just that! We offer a Tan PVC or synthetic wood option, either way, there's absolutely no maintenance needed.

Make your Sutherland pool the most energy efficient pool on the market. Most on-ground or semi-inground pool owners use a solar cover to help maintain water temperature. However, they often miss the importance of insulating the sides of pools, which helps prevent heat loss. Studies have shown you can reduce your monthly operating costs with the use of a sufficiently insulated pool wall.

Sutherland gives you many exterior finish options, not just one. And, you can change it at any time, just because you want to! **The siding kits will give your pool the aesthetics you're looking for to enhance your landscape.**

THE SUTHERLAND

Sutherland Options

You can add just about any option to your Sutherland Pool depending on the installation you choose. Here are just a few. Be sure to ask your dealer for other options that may be available.

Aframe Ladder: Your Sutherland dealer will recommend the best aboveground ladder option for your pool. If your plans include a deck, your dealer will recommend the appropriate deck to pool ladder.

Foam Insulation Kit: Your Sutherland dealer can insulate your pool walls with an anti-microbial foam that has an R-value of 7 at a 1" thickness.

Snap In Pool Cover: Because your Sutherland pool has a bead receiver, it allows for a snap in pool cover. Aesthetically pleasing and it protects your pool from damage and debris in the off season.

LED Lights: Light up your life with led lighting. Make your nighttime swims more fun and more enjoyable. Depending on the lights you choose, you can change the colors with your mode.

Filtration: Optional pool equipment is available in Sand, D.E., or Cartridge.

Coping Options
