

What is the Certified Pool-Spa Operator Program?

The Certified Pool-Spa Operator program has delivered more training than any other program in the pool and spa industry since 1972, resulting in more than 200,000 successful CPO certifications in 44 countries. The CPO program is widely accepted by health departments, including DHEC in South Carolina.

Instructors receive comprehensive training and certification to teach the program. These instructors represent every segment of the aquatic industry including operators, health officials, builders, manufacturers, retailers and academicians.

The training provided helps protect swimmers from undue risk and health concerns associated with the aquatics environment.

Throughout the 16 hour course, students will discuss safety, regulations, water chemistry, turnover requirements, and a host of other related topics. Local codes and regulations will also be provided to each student.

For further information about the program, please contact the instructor or visit the National Swimming Pool Foundation website at:

www.nspf.org

CPO Course General Information & Registration

- The CPO Class requires a two day class (14-16 hours) taught by a certified instructor.
- Certification requires the completion of an open book written examination.
- The CPO Certification is valid for five years
- Classes are typically comprised of industry and aquatic care professionals.
- Course cost includes the Operator Handbook.
- Topics include a section for local and state codes. In South Carolina, the program includes the supplemental DHEC exam.
- CPO Certification is recognized nationally and is required in most areas.
