

A Cover for
EVERY

ENVIRONMENT

We've got a beautiful solution that covers your pool in any location and across all seasons. From solids to mesh alternatives we've got the protection and security you can rely on year after year.

AquaMaster™ Solid Covers

The AquaMaster™ series of lightweight solid covers are 50% lighter than conventional vinyl solid covers, but up to 70% stronger. This tough, non-porous material blocks sunlight and helps prohibit algae growth, plus the durable coating will not fade or stain. Featuring your choice of a mesh drain panel or a Rule pump, the AquaMaster™ is a solid pool cover choice.

BlocMesh 99™*

Protect your pool with BlocMesh 99™, the revolutionary new pool cover material. Specially designed to block up to 99% of sunlight penetration, its super tight weave prevents debris and fine particles from entering your pool. Combining the benefits of a water-draining mesh cover with the cleanliness of a solid cover, BlocMesh 99™ is a proven performer.

Compare these industry-leading features on our standard mesh covers:

QUALITY CONTROL - Triple white bonded polyester stitching is used on all our webbing seams for visual inspection purposes, ensuring that no stitches are dropped. Consistent quality is ensured throughout the manufacturing process with systematic checks and the issuance of a signed inspection card for every cover.

STRENGTH AND DURABILITY - All strap cross-sections and perimeter points feature cross-stitched reinforcement. Specially treated, U.V. resistant polyester thread is used throughout the cover.

SOLID CONNECTIONS - Corrosion-resistant brass anchors with stainless steel springs secure your cover and fit flush to the deck when not in use.

PROTECTIVE RUB STRIP - Industry leading 22" soft component rub strips protect the cover and your pool coping from excessive wear.

DOUBLE-LAYERED STRAPPING - A durable grid of strapping on both sides makes our pool covers the strongest per square foot in the industry.

IDENTIFICATION CODE - An industry first! Each cover has a registered serial number sewn into the cover perimeter. If the cover ever needs replacement, a duplicate cover matching all straps to your existing anchors is easily manufactured.
