

INSIDE RADIUS STAIR

INSIDE STRAIGHT STAIR

THE *Nexus* STAIR SYSTEM

Inside Built-In Vinyl Covered Stairs, Sun decks and Cuddle Coves are now available on Matrix polymer pools. Engineered forms made with special polymer risers and a sturdy truss coupled with finished concrete treads awaits a Matrix custom-fitted tailored liner.

Choose from Full End to Curved to Roman stair designs. How about a Sundeck or deep-end Cuddle Cove? The choice is yours!

A freeform shape like a Mountain Lake or Kidney pool with inside radius stairs offers the look of luxury never available before on a Matrix pool.

If a rectangle shape pool is your preference, a full end stair is now available to suit the exact width of your pool. A popular size is an 18' x 36' rectangle with 18' wide end stairs. End stairs are perfect for auto covers. Inside stairs are a space saver as well allowing for more area for lounge chairs or tables on the exterior deck.

A Nexus Stair System is built with aesthetics, safety and comfort in mind. When you choose a built-in stair, you're enhancing the overall look of your backyard space. Take notice of how the liner floor pattern continues upward through each riser and tread. It's a natural complement.

A Matrix stair liner comes exclusively with "Impressions", a textured printed stair material designed for safety and comfort. "Impressions" is the ability to form a texture on printed material using advanced methods of heat and pressure. This tough 28 mil material provides slip resisting qualities ready for a high traffic area.
