

AUTOMATIC COVER ENCLOSURE

Introducing our new *ace in the hole!*

PATENT PENDING TECHNOLOGY & INNOVATION

Imperial Pools is thrilled to announce the launch of our new Auto Cover Enclosure (ACE). This patent-pending, cutting-edge enclosure is specifically designed to be used for our 54" Personal Pools in conjunction with Cover Pools T4 Automatic Pool Cover system. The ACE system offers increased efficiency, cost savings and profitability, revolutionizing the installation process for auto covers.

KEY ADVANTAGES OF THE ACE SYSTEM

SIMULTANEOUS INSTALLATION

The system can be installed at the same time as the pool panels.

REDUCED CONCRETE NEEDS

No extra concrete required beyond the footing when using an aluminum lid. A minimal amount is needed for a stone lid, easily handled without an extra concrete mixing truck.

ELIMINATES OEM PARTS

No need for OEM spacers, brackets, and vertical supports, reducing project costs and installation time.

PRESET ELECTRICAL CONNECTIONS

The ACE is set up for electrical connections on either side, eliminating the need to run conduit through traditional concrete housing.

STREAMLINED WIRING PROCESS

Electricians can wire the box while bonding the pool, avoiding a return visit post-pour.

VERSATILE ORIENTATION

The ACE system is designed for both left and right motor orientation with a 2' offset on each side.

NO SPECIAL TRAINING REQUIRED

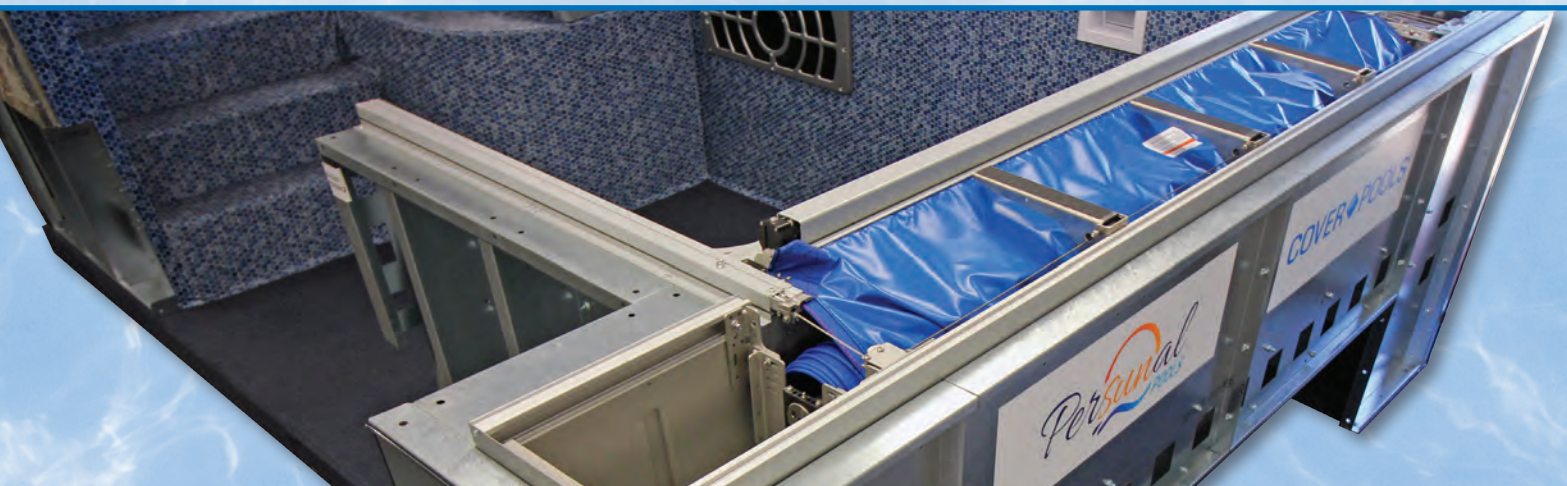

Builders familiar with panel assembly will easily grasp the ACE installation process.

HIGH-QUALITY MATERIALS

Made from Imperial's high-quality steel and fortified with Imperial Armor Guard.

LIMITED LIFETIME WARRANTY

Ensures long-term reliability and peace of mind.

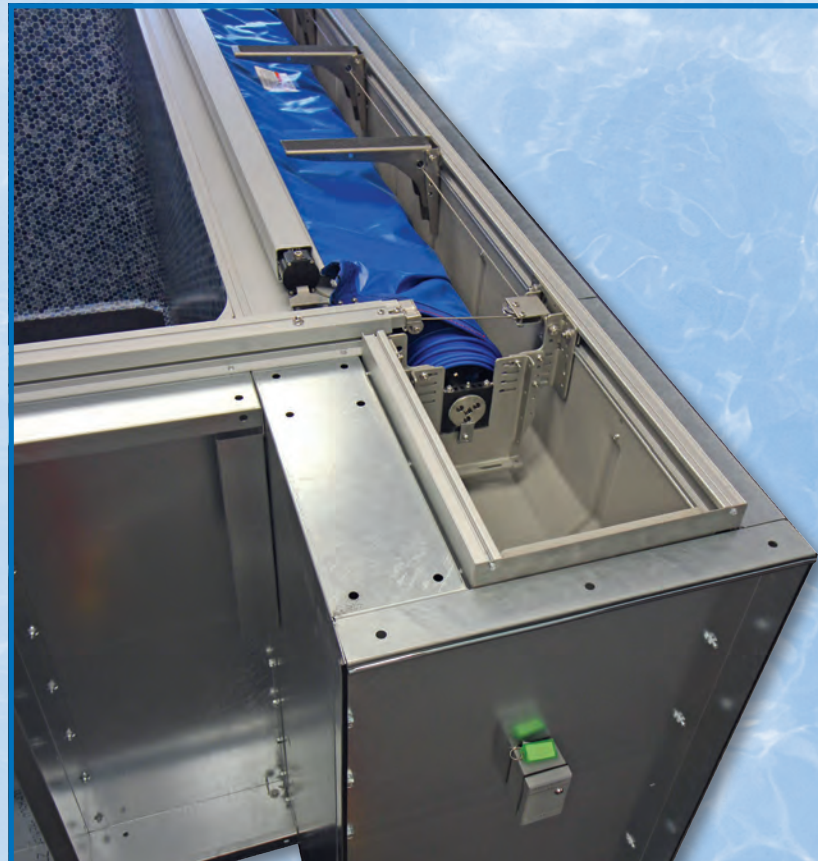

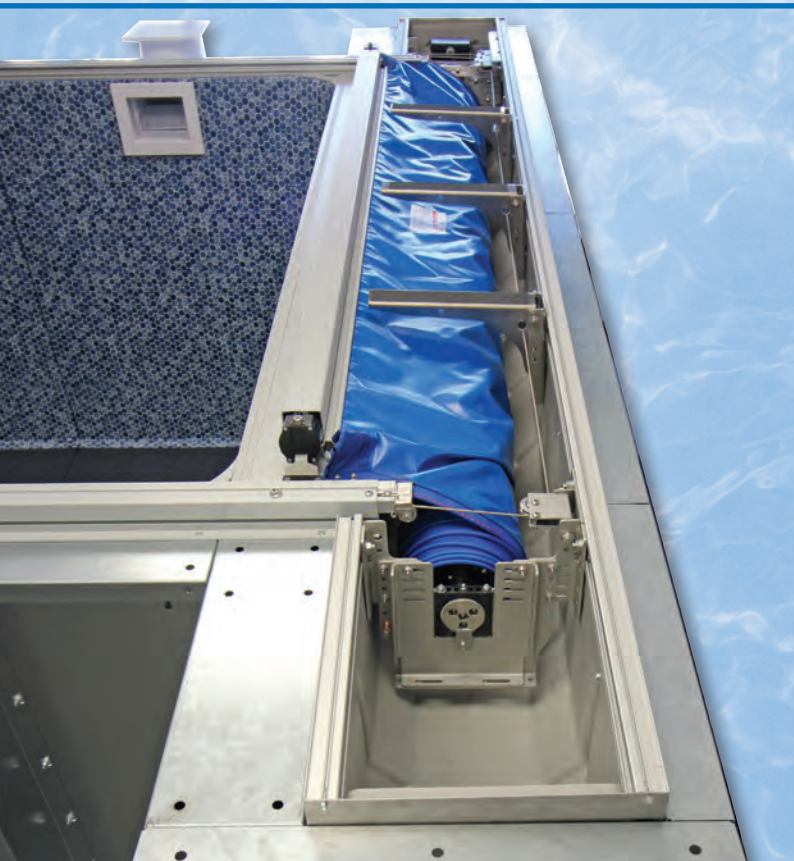

AUTOMATIC COVER ENCLOSURE

Ace your auto cover installations with ACE by Imperial Pools.

PATENT PENDING TECHNOLOGY & INNOVATION

The ACE system by Imperial Pools is a revolutionary solution that prioritizes speed without compromising top-notch quality. With our ACE, excellence and savings go hand in hand! By opting for this innovative system, you can save thousands of dollars compared to conventional installation methods and eliminate an entire day from the project.
