Reduces demand on sanitizer
(Estimated between 30-50%)

Increases overall water quality and eases maintenance

Compatible with all types of sanitizers

Soft Water makes water better!

swimming pool chemicals

PRODUCT SPOTLIGHT

Hello SOFT WATER

BORATE BASED WATER ENHANCER

OVERVIEW:

- Fast Dissolving Borate
- Softens Water
- Reduces Sanitizer Demand
- Algastat
- Proprietary Blend

DIRECTIONS FOR USE:

- Apply 2 lbs of *Hello SoftWater* per 1,000 gallons of water. For best results, add the product in two applications, 8 hours apart.
- Allow pool to operate normally for 24 hours. Then, using a reliable test kit, test pool water to ensure Borate level is at the desired 30-50 ppm range. For maintenance treatment, add 7 lbs of *Hello SoftWater* for every 10,000 gallons of water to raise level by 10 ppm.
- To maximize the efficiency of the product, test your water at least once a week to ensure Sanitizer, pH and Alkalinity levels are within the appropriate range. The residual of this product must also be treated at least once a month and maintained at 30 ppm.
